HeartFelt®  
The Ceiling that *had* to be made

HeartFelt® linear can be applied as ceiling and wall system. Available in box-shaped and rounded panels. HeartFelt® Baffle is applicable as a ceiling system.
HeartFelt® is available in 5 grey shades, ranging from white to black and in 5 earth tones. The proportion of the coloured and white PES fibres determines the colour of the panels. Therefore colours may differ from presented samples.

PES fibres
HeartFelt® is a linear ceiling system with open joints made of non-woven thermoformed PES fibres.

Wall application
We recommend using only the 55 mm linear boxshaped and 64 mm rounded panels and install them vertically.

Colours may vary from the original
